

## Situation in Donbass, Ukraine

Following recent decisions of the DNR - self-proclaimed Donetsk People's Republic - establishing its administrative control over some Ukrainian companies (including Air Liquide Yenakievo) operating in the Donbass region, Air Liquide is no longer able to continue its remaining activities in that region.

The security of our employees as well as compliance with applicable Ukrainian and international laws remain our priorities.

### **Air Liquide in Ukraine**

Air Liquide has been present in Ukraine since 1992 through its Engineering and Construction activity. In 2011, Air Liquide started the production and selling of industrial gases. In the Donbass, Air Liquide owns an oxygen production unit dedicated to supply one steel customer. This activity is not significant given the size of the Group's activities in Europe.
