

Sanofi to invest €350 million in Canadian vaccine facility

- * Expansion demonstrates company's commitment to innovation and leadership in global public health
- * New Toronto facility is one of the largest-ever investments by Sanofi in a single building
- * Significantly increases capacity to meet growing demand for pediatric and booster vaccines

PARIS – April 12, 2018 – Sanofi is investing €350 million (CAD \$500 million) for the construction of a new state-of-the-art vaccine manufacturing facility at the Sanofi Pasteur Canadian headquarters in Toronto, Ontario. The investment bolsters the company's Canadian operations and its commitment to advancing public health around the world.

The announcement will be made during an event today at Sanofi Pasteur's Toronto facility. Attendees will include the Honourable Navdeep Bains, Minister of Innovation, Science and Economic Development, Government of Canada, the Honourable Steven Del Duca, Minister of Economic Development and Growth, Government of Ontario, and members of Sanofi's executive leadership.

"Canada has a strong legacy in the research and development of vaccines. With this investment, Sanofi is renewing our longstanding commitment to making Canada central in our effort to protect and improve human health across the globe," said David Loew, Executive Vice President and Head of Sanofi Pasteur. *"Vaccines save three million lives every year and this new facility will take us one step closer to a world where no one suffers or dies from a vaccine-preventable disease."*

The new facility will allow Sanofi Pasteur, the vaccines global business unit of Sanofi, to meet the growing demand of five-component acellular pertussis (5-acP) antigen. Upon completion in 2021, the new building will also be equipped to produce the antigens used in the diphtheria and tetanus vaccines.

“This project is one of the most important investments for the Sanofi global industrial network,” said Philippe Luscan, Executive Vice President, Global Industrial Affairs, Sanofi. *“It demonstrates our continued commitment to manufacturing excellence and to better serving our vaccines portfolio to people all over the world.”*

About the Sanofi Pasteur Canadian Facilities

Founded as the Connaught Antitoxin Laboratories and University Farm in 1917, Sanofi Pasteur's Canadian facility has supported numerous scientific breakthroughs while making significant public health contributions. The Toronto site was home to the world's first large-scale commercial insulin production and was the sole supplier of the diabetes treatment to Canadians until the 1980s. It also produced a highly accessible antitoxin for diphtheria, the leading public health threat to Canadian children in the early 1900s, and was an important partner in the eradication of polio in North America and smallpox around the world.

About Sanofi

Sanofi is dedicated to supporting people through their health challenges. We are a global biopharmaceutical company focused on human health. We prevent illness with vaccines, provide innovative treatments to fight pain and ease suffering. We stand by the few who suffer from rare diseases and the millions with long-term chronic conditions.

With more than 100,000 people in 100 countries, Sanofi is transforming scientific innovation into healthcare solutions around the globe.

Sanofi Forward-Looking Statements

This press release contains forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995, as amended. Forward-looking statements are statements that are not historical facts. These statements include projections and estimates and their underlying assumptions, statements regarding plans, objectives, intentions and expectations with respect to future financial results, events,

operations, services, product development and potential, and statements regarding future performance. Forward-looking statements are generally identified by the words “expects”, “anticipates”, “believes”, “intends”, “estimates”, “plans” and similar expressions. Although Sanofi’s management believes that the expectations reflected in such forward-looking statements are reasonable, investors are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of Sanofi, that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include among other things, the uncertainties inherent in research and development, future clinical data and analysis, including post marketing, decisions by regulatory authorities, such as the FDA or the EMA, regarding whether and when to approve any drug, device or biological application that may be filed for any such product candidates as well as their decisions regarding labelling and other matters that could affect the availability or commercial potential of such product candidates, the absence of guarantee that the product candidates if approved will be commercially successful, the future approval and commercial success of therapeutic alternatives, Sanofi’s ability to benefit from external growth opportunities and/or obtain regulatory clearances, risks associated with intellectual property and any related pending or future litigation and the ultimate outcome of such litigation, trends in exchange rates and prevailing interest rates, volatile economic conditions, the impact of cost containment initiatives and subsequent changes thereto, the average number of shares outstanding as well as those discussed or identified in the public filings with the SEC and the AMF made by Sanofi, including those listed under “Risk Factors” and “Cautionary Statement Regarding Forward-Looking Statements” in Sanofi’s annual report on Form 20-F for the year ended December 31, 2017. Other than as required by applicable law, Sanofi does not undertake any obligation to update or revise any forward-looking information or statements.
